Earths Climate Zone Manual Answers
The earth has six different climate zones. The characteristics of each climate zone vary according to the features of the land where that climate zone is present. Details such as the sort of bodies of water are in or near the area, as well as the area's location upon the earth, are important factors in determining what sort of climate is in that specific region of the world.

Answers about Earth Sciences
Earth's Changing Climate . Earth's climate has changed many times. For example, fossils from the Cretaceous period (144 to 65 million years ago) show that Earth was much warmer than it is today. Fossilized plants and animals that normally live in warm environments have been found at much higher latitudes than they could survive at today.
