Brainworx designed bx_limiter to be used on multiple busses to smoothen things out and glue them together prior to running through a full blown mastering limiter, like the Brainworx bx_XL V2 or bx_masterdesk. These plugins work best - and most importantly sound best - when they don't have TOO MUCH limiting to do. bx_limiter offers a great sounding limiter algorithm, then adds some great ...

The bx_Limiter is vanilla in the best ways. In my little home studio, it just won a shootout for the role of louderizing a mix with a lot of high end trouble and disturbance. The competitors were the bx_masterdesk, which I have been loving, the Shadow Hills (non class A), and a couple of UAD products. To say that the bx_Limiter was the most transparent doesn't even get at it; it was the ONLY ...

I only used the stock mastering settings in the manual too because there are so many options with eq curves and tube saturation that it gets overwhelming. But on the stock recommendations this does everything you want. Glues the track together. Controls bass without it getting loose or boomy. Adds heft in a transparent way. You can also really push this past the normal 1-3 db of reduction and ...

Climate change is already beginning to affect New York State, and these impacts are projected to grow. At the same time, the state has the ability to develop adaptation strategies to prepare for and respond to climate risks now and in the future. The ClimAID assessment provides information on climate change impacts and adaptation for eight sectors in New York State: water resources, coastal zones, ecosystems, agriculture, energy, transportation, telecommunications, and public health. Observed climate trends and future climate projections were developed for seven regions across the state. Within each of the sectors, climate risks, vulnerabilities, and adaptation strategies are identified. Integrating themes across all of the sectors are equity and environmental justice and economics. Case studies are used to examine specific vulnerabilities and potential adaptation strategies in each of the eight sectors. These case studies also illustrate the linkages among climate vulnerabilities, risks, and adaptation, and demonstrate specific monitoring needs. Stakeholder participation was critical to the ClimAID assessment process to ensure relevance to decision makers across the state.--[Source inconnue].

All Beatrice Shakespeare Smith has ever wanted is a true family of her own. And she's close to reuniting her parents when her father disappears. Now Bertie must deal with a vengeful sea goddess and a mysterious queen as she tries to keep her family – and the Theatre Illuminata – from crumbling. To complicate it all, Bertie is torn between her two loves, Ariel and Nate.

There has been substantial church growth in Britain between 1980 and 2010. This is the controversial conclusion from the international team of scholars, who have drawn on interdisciplinary studies and the latest research from across the UK. Such church growth is seen to be on a large scale, is multi-ethnic and can be found across a wide range of social and geographical contexts. It is happening inside mainline denominations but especially in specific regions such as London, in newer churches and amongst ethnic minorities. Church Growth in Britain provides a forceful critique of the notion of secularisation which dominates much of academia and the media - and which conditions the thinking of many churches and church leaders. This book demonstrates that, whilst decline is happening in some parts of the church, this needs to be balanced by recognition of the vitality of large swathes of the Christian church in Britain. Rebalancing the debate in this way requires wholesale change in our understanding of contemporary British Christianity.

Expectations are running high for significant outcomes on the temporary movement of natural persons to supply services – known as mode 4 – in the current WTO services negotiations. This report considers the questions involved.

The year is 1915 and sixteen-year-old Eliza Williams has just arrived at the Billings School for Girls, the sister school of Easton Academy, founded to turn girls into dutiful wives. Eliza's parents expect her to learn the qualities needed to be a graceful and obedient wife, but Eliza has a dangerous secret... she's a witch! After finding a dusty, leather-bound spell book, Eliza forms a secret coven with eleven other Billings girls, disguising their gatherings as a literary society to keep their teachers from discovering the truth. Bonded in sisterhood, they cast spells - cursing the headmistress, giving blisters to boys with wandering hands and conjuring beautiful dresses out of rags. The girls taste freedom and power for the first time, but what starts out as innocent fun turns into something more sinister when one of the spells has an unexpected - and deadly - consequence. Eliza realises that magic could bring her everything she's ever wanted... but it could also destroy everything she holds dear. But is it too late to stop what she's started?
