Celebrate the thirtieth anniversary of the Newbery Honor-winning survival novel Hatchet with a pocket-sized edition perfect for travelers to take along on their own adventures. This special anniversary edition includes a new introduction and commentary by author Gary Paulsen, pen-and-ink illustrations by Drew Willis, and a water resistant cover. Hatchet has also been nominated as one of America's best-loved novels by PBS's The Great American Read. Thirteen-year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from

his ordeal with new patience and maturity, and a greater understanding of himself and his parents.

Rev. ed. of: Pharmacology and the nursing process / Linda Lane Lilley ... [et al.]. 6th ed. c2011.

With its colorful, user-friendly format, *Pharmacology and the Nursing Process, 7th Edition* provides students with all the pharmacology information they need – and no more than they need – to administer drugs safely and effectively. Increased emphasis on the nursing process and prioritization focuses on the most essential assessments, nursing diagnoses, interventions, and evaluations. Thoroughly updated drug information is clear and concise, highlighting the most commonly used drugs, and includes a unique focus on safety-oriented QSEN competencies. Hundreds of full-color illustrations show how drugs work in the body and depict key steps in drug administration. Written by expert pharmacology educators and clinicians, this bestselling textbook employs innovative, practical learning aids to help your students prepare for success on the NCLEX® Examination and in nursing practice. Focus on need-to-know information provides the most essential drug information for safe, effective clinical practice. Focus on the nursing process and prioritization helps you apply the nursing process to all aspects of drug therapy, from assessment to nursing diagnoses, interventions, and evaluation/outcome criteria. UNIQUE! Illustrated Study Skills Tips include practical advice on time management, note taking, study techniques, and test-taking strategies. Special boxes and tables highlight evidence-based practice, dosages, pharmacokinetics, laboratory values related to drug therapy, preventing medication errors, cultural implications, lifespan considerations, herbal therapies, and legal and ethical principles. Nearly 300 full-color illustrations and the Photo Atlas of Drug Administration show how drugs work in the body and depict key steps in drug administration by various routes. NCLEX® Examination-style review questions are included in every chapter, with at least one alternate-format item per chapter and more than 40 new dosage calculation questions. Drug profiles highlight the pharmacokinetics and unique variations of commonly used drugs. Case studies promote clinical reasoning skills related to nursing pharmacology. Patient Teaching Tips include key points to convey to patients, their families, and their caregivers.

This volume brings together educational effectiveness research and international large-scale assessments, demonstrating how the two fields can be applied to inspire and improve each other, and providing readers direct links to instruments that cover a broad range of topics and have been shown to work in more than 70 countries. The book's initial chapters introduce and summarize recent discussions and developments in the conceptualization, implementation, and evaluation of international large-scale context assessments and provide an outlook on possible future developments. Subsequently, three thematic sections – “Student Background”, “Outcomes of Education Beyond Achievement”, and “Learning in Schools” – each present a series of chapters that provide the conceptual background for a wide range of important topics in education research, policy, and practice. Each chapter defines a conceptual framework that relates recent findings in the educational effectiveness research literature to current issues in education policy and practice. These frameworks were used to develop interesting and relevant indicators that may be used for meaningful reporting from international assessments, other cross-cultural research, or national studies. Using the example of one particular survey (the Programme for International Student Assessment (PISA 2015)), this volume links all theoretical considerations to fully developed questionnaire material that was field tested and evaluated in questionnaires for students and their parents as well as teachers and principals in their schools. The primary purposes of this book are to inform readers about how education effectiveness research and international large-scale assessments are already interacting to inform research and policymaking; to identify areas where a closer collaboration of both fields or input from other areas could further improve this work; to provide sound theoretical frameworks for future work in both fields; and finally to relate these theoretical debates to currently available and evaluated material for future context assessments.
