'Laser B1' is part of third level course designed for young students. The Laser series has been revised and updated to include PET preparation tasks and changes to the Cambridge ESOL FCE examination. A Student's Book integrates development of key reading, writing, listening and speaking skills; Includes CD-ROM that intends to motivate reinforcement of the structures and vocabulary; 'Dictionary corner' sections, focusing on topic-based lexis, collocations, word formation and phrasal verbs; A Teacher's Book - includes a Test CD Pack. A workbook - With or without wey with a class Audio CD.

Includes a DVD-ROM with tests, test generator, teacher-support videos and a separate disc providing access to the Digibook. This is a page-faithful, digital version of the Student's Book with embedded audio designed for classroom use. Teachers can utilise the answer keys, use the zoom tool and link to explanations for the grammar database.

This is a new level in the Laser series, designed to help students in the transition towards more exam-related study. The Audio CD contains all the songs featured in the Student's Book for classroom

In 1957 Gordon Gould, then an obscure physicist and perennial graduate student, conceived one of the revolutionary inventions of the twentieth century -- the laser. But before he could submit a patent application, a prominent professor of physics whose office was next door to Gould's filed his own laser patent claims. Gould fought to reclaim the rights to his work, beginning a battle that would last nearly thirty years. Many millions of dollars, as well as the integrity of scientific claims, were at stake in the litigation that ensued. Laser is Gould's story -- and an eye-opening look at the patent process in America, the nexus of the worlds of business and science. Gould was struggling to finish his Ph.D. thesis when he struck upon the concept for the laser, or Light Amplification by Stimulated Emission of Radiation. Light waves, Gould realized, would form a single concentrated beam when reflected between two mirrors inside a gas-filled chamber. Even as he was sketching his invention, Gould foresaw the tremendous potential of the laser in industry, communications, and the military. For three days he feverishly documented his ideas in a notebook, which he had notarized in a candy store near his Bronx apartment. A small technology firm took a great interest in Gould's laser and soon won a Defense Department contract to develop lasers for the military. Ironically, Gould was denied a security clearance because of his past communist associations, and so was unable to work on his own invention. He could only watch from the sidelines as colleagues tried to build a working laser in a desperate race with larger, better-funded research labs. Meanwhile, Gould's rival, Charles Townes, had everything that Gould lacked, most notably important academic and government appointments and esteem in the scientific community. In the dispute between the two men, few doubted Townes's word, while nearly everyone scoffed at Gould's claims. But Gould's determination was unyielding, and he fought everyone who stood in his way, including the U.S. Patent Office, major corporations, and the entire laser industry, until he finally won. Gordon Gould, the courts ruled, had invented the laser. Laser is a grand story of technology and law. Nick Taylor has extensively interviewed Gould as well as other key participants in the battle over the laser's invention and patents. In this riveting account of genius, rivalry, and greed, he shows just how difficult it is for the legendary lone inventor to prevail when the license to a valuable invention is at stake.

The Success International series offers a practical approach to language learning and support. Success International English Skills for Cambridge IGCSE® Teacher's Book offers teachers tips and advice for preparation for the Cambridge IGCSE® in English as a Second Language. The series has been fully updated in line with the revised syllabus updates, including a new text design, making the course

appealing and exciting. The series provides stimulating topics, international perspectives and relevant examples to encourage students to explore and improve their use of English. Answers to both the Student's Book and the Workbook are available in the Teacher's Book. Audio CD for listening activities included in Teacher's Book.

The forest is full of danger . . . but help is here. Meet Laser Moose and Rabbit Boy, improbable pals who use their powers—laser vision and an unrelenting sense of optimism—to fight the forces of evil. Join the dynamic duo as they battle aliens, a mutant fish-bear, a cyborg porcupine, and a mechanical squirrel, learning along the way that looking on the bright side might be just as powerful as shooting a laser. Get ready for hilarious, action-packed, laser-powered adventures written and drawn by Doug Savage, creator of the popular comic Savage Chickens. This is Savage's first graphic novel.
