content-oriented wiki and taking a content approach to administration on Meta does not work.

~~Meta:Manual para administradores—Meta~~

The { \$meta: "textScore" } expression can be a part of the projection document to include the text score metadata. The \$meta expression can be present in either an inclusion or an exclusion projection. If you set the expression to a field name that already exists in the document, the projected metadata value overwrites the existing value.
