C++ was written to help professional C# developers learn modern C++ programming. The aim of this book is to leverage your existing C# knowledge in order to expand your skills. Whether you need to use C++ in an upcoming project, or simply want to learn a new language (or reacquaint yourself with it), this book will help you learn all of the fundamental pieces of C++ so you can begin writing your own C++ programs. This updated and expanded second edition of Book provides a user-friendly introduction to the subject, Taking a clear structural framework, it guides the reader through the subject's core elements. A flowing writing style combines with the use of illustrations and diagrams throughout the text to ensure the reader understands even the most complex of concepts. This succinct and enlightening overview is a required reading for all those interested in the subject . We hope you find this book useful in shaping your future career & Business.

Ordinary refreshed USA and Canada Maps for huge vehicles: Drive on the right streets for your truck with particular steering for unsafe freight, vehicle size, weight, and max. speed. TomTom traffic and administrations by means of Bluetooth: Avoid stalling out in rush hour gridlock and realize your exact appearance times. Drive more secure by realizing when to break because of jam tail alerts. Updates through WiFi: Regular USA and Canada map updates and administration invigorates are speedy and simple with the accommodation of your TomTom Trucker GPS’s implicit WiFi. No PC required! 6" touchscreen in addition to mount: Secured by a specific snap and-drive mount see directions plainly on the high splendor and daylight comprehensible screen of your TomTom Trucker GPS. Sans hands calls and cell phone messages through Bluetooth: Enhance street security by matching your telephone with your truck GPS. Appreciate the accommodation of without hands calling and messages read for all to hear. Huge vehicle POIs: Know where to fuel up, take a rest, and administration your vehicle. Your Trucker GPS brings you subtleties on 1500+ fuel stations, leaving areas, and administration habitats for enormous vehicles.

Marine Corps Warfighting Publication (MCWP) 3-16.7, Marine Artillery Survey Operations, sets forth the doctrinal foundation and technical information that Marines need to provide accurate and timely survey support.

Overview
Laminated and spiral bound
Motor Carriers' Road Atlas for heavy-duty users
The #1 selling trucker's road atlas in North America is as tough as the rig you're driving. With its laminated pages and spiral binding, the Deluxe Motor Carriers' Road Atlas can stand up to all of the wear-and-tear from the road. Save time and money with this easy to use atlas.

This is the only comprehensive guide to mapping software that clearly explains how to interface your GPS receiver with your computer to create maps, annotate aerial photos, and even create 3-D maps. It includes where to find free software and maps, how to use aerial photos and satellite imagery, and how to view your favorite backcountry locations in 3-D.It brings sophisticated features once available only to professional cartographers within reach, at low cost or even free, to everyone who loves maps. Readers will discover how to make maps for free, download aerial photos, create and customize their own maps, use hidden tips and tricks, reduce the learning curve and get mapping right away, locate trailheads using a real-time moving map on a laptop or PDA, and how to best transfer information between a GPS, computer, and electronic maps.

Our intention in this collection is to provide, largely through original writings, an ex tended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a signifi cant number of the most important mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recog nition and interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a subject that provides mathe maticians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

Although the basic principles of lasers have remained unchanged in the past 20 years, there has been a shift in the kinds of lasers generating interest. Providing a comprehensive introduction to the operating principles and applications of lasers, this second edition of the classic book on the subject reveals the latest developments and applications of lasers. Placing more emphasis on applications of lasers and on optical physics, the book's self-contained discussions will appeal to physicists, chemists, optical scientists, engineers, and advanced undergraduate students.

Electricity -- Electronic components -- Semiconductors -- Photonic semiconductors -- Integrated circuits -- Digital integrated circuits -- Linear integrated circuits -- Circuit assembly tips -- 100 electronic circuits.
