The history of the wine press and of pressing is nearly as old as the history of wine itself with the remains of wine presses providing some of the longest-serving evidence of organised viticulture and winemaking in the ancient world. The earliest wine press was probably the human foot or hand, crushing and squeezing grapes into a bag or container where the contents would ferment.

History of the wine press - Wikipedia

Christ in the winepress or the mystical winepress is a motif in Christian iconography showing Christ standing in a winepress, where Christ himself becomes the grapes in the press. It derives from the interpretation by Augustine and other early theologians of a group of passages in the Bible, and is found as a visual image in Christian art between about 1100 and the 18th century, as well as in religious literature of many kinds. The image in art underwent a number of changes of emphasis, while re

A winepress is a device used to extract juice from crushed grapes during wine making. There are a number of different styles of presses that are used by wine makers but their overall functionality is the same. Each style of press exerts controlled pressure in order to free the juice from the fruit. The pressure must be controlled, especially with grapes, in order to avoid crushing the seeds and releasing a great deal of undesirable tannins into the wine. Wine was being made at least as long ago

The thirteen stories in this collection track strained lives, characters compressed by the crises of our times, from clerical misdeeds to school shootings. Never settling for easy exits, these intense fictions portray a world distrustful of its former guides but populated still by souls searching and finding.

One important legacy of colonialism is the separation of a culture from the land upon which its people live. Populations are displaced; topographical objects are renamed, and the land becomes a resource to be exploited. Starting with three landscapes viewed as threatening by the Europeans who colonized them, <I>Imagined Topographies examines the ways artists, writers, and musicians distill new meaning in formerly colonized spaces through the articulation of landscapes that are homelands, not commodities. In the Irish bog Seamus Heaney explores legacies of violence, John Dunne looks at rural poverty and religious faith, and Catherine Harper creates art connecting landscape and gender. Influenced by the Amazon, Wilson Harris creates dense multi-layered Guyanese epics, Karen Tei Yamashita plays with the telenovela to explore the role of multinational corporations in deforestation, and in recordings Douglas Quin combines the natural world with the technological, raising questions of connected cultural and natural loss. The two landscapes of Australia, the empty land of the colonizers and the fertile land known by the original inhabitants, are explored in the novels of David Malouf, while Peter Carey turns to the animal world to define the Australian national character, and the people of Ramingining, in films and a website created in collaboration with the filmmaker Rolf de Heer, intervene in the Australian land rights struggle. Challenging the dominant perceptions of land in these regions, artists, musicians, and writers create new visions of landscapes tied to cultures where social and ecological justice offer choices other than emigration and habitat destruction.

A field guide to the new world of wine, featuring an overview of today's most exciting regions and easy-to-use advice on properly tasting wine, discovering under-the-radar gems, and finding the perfect bottle for any occasion. Highlighting wines from old world regions such as France, Italy, Spain, and Germany to new world wines from the United States, Australia, New Zealand, Chile, and more, *The Essential Wine Book* tells you what to drink and why. Beginning with foundational information about how wine is made, how to taste it, and how to understand terroir, wine expert and journalist Zachary Sussman then gives an overview of the most important and interesting wine regions today—both established and still emerging. For instance, the great French wines of Burgundy and Champagne are already well known, but for affordable bottles you can easily find at your local wine shop, Sussman profiles up-and-coming producers in other regions, including the Jura, Languedoc-Roussillon, and more. In a similar vein, California's Napa Valley has for decades been the source of America's most prestigious wines, but here you'll learn about other areas of the state that are gaining recognition, from Lodi to the Santa Rita Hills. You'll find user-friendly "just the highlights" notes for each region, as well as recommendations for producers and particular bottles to seek out. Diving deep into what makes each region essential and unique, this comprehensive guide gives new wine drinkers and enthusiasts alike an inside track on modern wine culture.

This book chronicles the personal journey of pioneering female winery owner Susan Sokol Blosser, from deciding on a whim to grow wine grapes in the early 1970s, to the trials and tribulations of starting her family-owned winery, Sokol Blosser, in the then little-known Willamette Valley, to the transfer of leadership from the first generation to the present. The themes of feminism, love, and loss are woven throughout the candidly rendered tale, which is interspersed with delicious recipes representing key moments in the author's life.

Explores the varieties and qualities of California wines, developments in vineyard management, viticulture, and winemaking, and the steady rise to international prominence of California wines

A comprehensive guide to the must-know wines and producers of California's "new generation," and the story of the iconoclastic young winemakers who have changed the face of California viticulture in recent years. *The New California Wine* is the untold story of the California wine industry: the young, innovative producers who are rewriting the rules of contemporary winemaking; their quest to express the uniqueness of California terroir; and the continuing battle to move the state away from the overly-technocratic, reactionary practices of its recent past. Jon Bonné writes from the front lines of the California wine revolution, where he has access to the fascinating stories, philosophies, and techniques of top producers. Part narrative, part authoritative purchasing reference, *The New California Wine* is a necessary addition to any wine lover's bookshelf.
