A set of instructional materials intended to supplement the lectures and textbook of a standard introductory physics course

Appropriate as a supplemental text for conceptual recitation/tutorial sections of introductory undergraduate physics courses. This landmark book presents a series of physics tutorials designed by a leading physics education researcher. Emphasizing the development of concepts and scientific reasoning skill, the tutorials focus on the specific conceptual and reasoning difficulties that students tend to find the most difficult. This is a Preliminary Version offering tutorials for a range of topics is Mechanics, E & M, Waves & Optics. The complete tutorials will be published in 1999.

This package contains: 130970697: Tutorials In Introductory Physics and Homework Package 0032173338X: University Physics Volume 1 (Chs. 1-20) 0321741269: MasteringPhysics with Pearson eText Student Access Code Card for University Physics (ME component)

The Activity-Based Tutorials are designed to accompany and enhance lecture instruction. They have been developed using a cycle of physics education research, including investigations into student learning on a given topic, development of materials, and revision of the materials based on evaluation after use in the classroom. Activity-Based Tutorials, Volume 1: Introductory Physics presents tutorials for topics in kinematics dynamics, oscillations, waves, heat and temperature, electrostatics, and circuits.
