The questions you ask before visualizing data will help you figure out what charts to use. Otherwise, you end up with rambling, unfocused graphics, which is fine for analysis and exploration but not so much for data presentation. Let's keep poking at this population dataset to see how this works in practice. First, here's a sample of the data:

We can illuminate the particles with a sheet of laser light in order to visualize a slice of a complicated fluid flow pattern. Assuming that the particles faithfully follow the streamlines of the flow, we can not only visualize the flow but also measure its velocity using the particle image velocimetry or particle tracking velocimetry methods. Particles with densities that match that of the fluid flow will exhibit the most accurate visualization.
